DATE:	February 21, 2024
TO:	Board of Directors
RE:	FY 2022-23 OPEB ACTUARY/GASB 75 REPORT
SUBMITTED BY:	Mary A. Morris-Mayorga, General Manager

Recommended Action

Staff recommends that the Board accept this report as prepared by the actuary, Nicolay Consulting, and reviewed by the Finance Committee on February 13, 2024.

Background

Prior to the 1995 agreement with El Cerrito for fire protection services, the District had firefighter employees. The District provides post-retirement health benefits (medical, dental and vision) to this group of former employees who have retired from the District and to their surviving spouses and dependent children. All of the retiree's health plan premiums are paid by the District. There are currently nine participants receiving post-retirement health benefits.

This post-retirement benefit represents a liability which the District funds through an OPEB Trust which has been established with the California Employers' Retiree Benefit Trust (CERBT). This is an irrevocable trust fund that allows public employers to prefund the future cost of their retiree health insurance benefits and other post-employment benefits (OPEB) for their covered retirees.

As a participating agency of CERBT and as required for the annual audit, the OPEB Actuarial GASB 75 Report for Fiscal Year 2022-23 has been completed by Nicolay Consulting. The required information will be included in the audit and provided to CERBT for their annual reporting. The District contributed funding to CERBT in 2008 so the OPEB liability is fully funded as of the date of the Actuarial Valuation.

Fiscal Impact

The District's OPEB liability is 163% funded and decreased \$46,361 so no additional funding is needed. The cost of the GASB 75 Report is included in the Fiscal Year 2023-24 Budget.

Re: Kensington Fire Protection District GASB 75 Report for FYE June 30, 2023

Dear Ms. Morris-Mayorga,

Kensington Fire Protection District (the "District") has retained Nicolay Consulting Group to complete this valuation of the District's postemployment medical program (the "Plan") as of June 30, 2022 measurement date compliant under Governmental Accounting Standards Board (GASB) Statement 75.

The purpose of this valuation is to determine the value of the expected postretirement benefits for current and future retirees and the Net OPEB Liability and OPEB Benefit Cost for the fiscal year ending June 30, 2023. The amounts reported herein are not necessarily appropriate for use for a different fiscal year without adjustment.

Based on the foregoing, the cost results and actuarial exhibits presented in this report were determined on a consistent and objective basis in accordance with applicable Actuarial Standards of Practice and generally accepted actuarial procedures. We believe they fully and fairly disclose the actuarial position of the Plan based on the plan provisions, employee and plan cost data submitted.

The actuarial calculations were completed under the supervision of Sue Simon and Earlene Young. They are members of the American Academy of Actuaries who meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion herein. To the best of our knowledge, the information supplied in the actuarial valuation is complete and accurate. In our opinion, assumptions as approved by the plan sponsor are reasonably related to the experience of and expectations for the Plan.

We would be pleased to answer any questions on the material contained in this report or to provide explanation or further detail as may be appropriate.

(1) Census data as of June 30, 2021 is used in the measurement of the TOL as of June 30, 2022. See Section III for additional details on the demographic data.

Section I Management Summary

B) Gap Analysis

The Total OPEB Liability has decreased \$46,361 from \$856,764 as of June 30, 2021 to \$810,403 as of June 30, 2022. This decrease is primarily due to interest on the total OPEB liability, offset by the expected benefit payments during the year.

Interim Valuation

This report presents liabilities as of the measurement date that are based on an interim valuation.

GASB 75 allows plan sponsors to perform valuations biennially, meaning the results for a valuation can be rolled forward to up to two GASB 75 measurement dates. The valuation date can precede a GASB 75 measurement date as long as the results would not be materially different had an updated census been collected as of the measurement date. Therefore, if the District has had a significant shift in participant demographics between the valuation date and a GASB 75 measurement date, an updated census must be collected and a full valuation performed.

When a full valuation is performed the inputs to the valuation (participant census, plan provisions, assets, and actuarial assumptions and methods) are reviewed and updated.

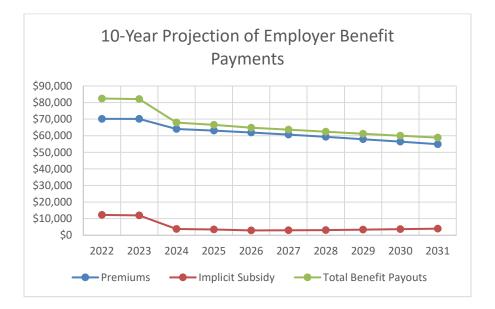

When an interim valuation is performed, only assets, plan provision changes materially impacting the results, and the discount rate to the extent that it is based on a yield or index rate for a 20-year, tax exempt general obligation municipal bond are updated.

C) 10-Year Projection of Employer's Benefit Payments

In this table we show the projected pay-as-you-go costs (employer's share of premiums), the implicit subsidy, and total expected benefit payments. The implicit subsidy reflects the shortfall of premiums versus the true cost of coverage. The shortfall exists because claims for active employees are combined with claims of retirees (who generally are older and cost more) to develop a single flat premium paid by both groups.

Plan Year Beginning 7/1	Employer's Share of Premiums	Implicit Subsidy	Total

C) Derivation of Significant Actuarial Assumptions

Long-term Expected Rate of Return – As of the June 30, 2021 valuation date, the long-term expected rates of return for each major investment class in the Plan's portfolio are as follows:

Investment Class	Target Allocation	Long-Term Expected Real Rate of Return ¹
Equity	43.00%	5.43%
Fixed Income	49.00%	1.63%
REITs	8.00%	5.06%

¹JPMorgan arithmetic Long Term Capital Market assumptions and expected inflation of 2.26%.

The above table shows the target asset allocation in the CERBT Strategy 2 investment policy.

Discount rate – The discount rate is based on a blend of the long-term expected rate of return on assets for benefits covered by plan assets and a yield or index for 20-year, tax-exempt general obligation municipal bonds with an average rating of AA/Aa or better for benefits not covered by plan assets.

Above are the arithmetic long-term expected real rates of return by asset class for the next 10 years as provided in a report by JP Morgan. For years thereafter, returns were based on historical average index real returns over the last 30 years assuming a similar equity/fixed investment mix and a 2.26% inflation rate. Investment expenses were assumed to be 10 basis points per year. These returns were matched with cash flows for benefits covered by plan assets and the Bond Buyer 20-Bond General Obligation index was matched with cash flows not covered by plan assets to measure the reasonableness of the choice in discount rate.

	June 30, 2022	June 30, 2021
Discount Rate	6.73%	6.73%
Fidelity Municipal 20-GO Index	3.69%	N/A
Bond Buyer 20-Bond GO Index	N/A	2.16%

D) Sensitivity Analysis (Exhibit 3)

Sensitivity of the Net OPEB Liability to changes in the discount rate – The following presents the District's Net OPEB Liability if it were calculated using a discount rate that is 1% point lower (5.73%) or 1% point higher (7.73%) than the current rate:

Sensitivity of the Net OPEB Liability to changes in the Trend rate – The following presents the District's Net OPEB Liability if it were calculated using a trend table that has rates that are 1% point lower or 1% point higher than the current set of rates:

¹ Employers setting a discount rate based on the assumption that assets will be sufficient to cover all future benefit payments under the plan are assumed to annually make contributions equal to the actuarially determined contribution. Annual contributions made that are substantially less than the ADC would require additional support for use of a discount rate equal to the long-term expected return on trust assets.

² Covered-Employee Payroll represented above is based on covered-employee payroll provided by the employer. GASB 75 defines covered-employee payroll as the total payroll of employees that are provided benefits through the OPEB plan.

A) Summary of Demographic Information

The participant data used in the valuation was provided by the District as of June 30, 2021. It is assumed that this data is representative of the population as of June 30, 2022. While the participant data was checked for reasonableness, the data was not audited. The valuation results presented in this report are dependent upon the accuracy of the participant data provided. The table below presents a summary of the basic participant information for the active and retired participants covered under the terms of the Plan.

A) Plan Description

Eligibility and Contribution Requirements

The District has assumed responsibility for providing the entire cost of postretirement medical, dental and vision benefits to a closed group of retirees and their dependents. Retirees may enroll in any of the plans offered by the District. Retirees are currently enrolled in Blue Shield, PERS Care, and Kaiser Plans. The District also provides postretirement dental coverage through Delta Dental and postretirement vision coverage through VSP.

Assumption Changes

There have been no assumption changes since the last measurement date.

B) Actuarial Methods

Actuarial Cost Method	Entry Age Normal An actuarial cost method under which the Actuarial Present Value of the Projected Benefits of each individual included in the valuation is allocated on a level basis over the earnings or service of the individual between entry age and assumed exit age(s). The portion of this Actuarial Present Value allocated to a valuation year is called the Normal Cost.
Amortization Methodology	We used straight-line amortization. For assumption changes and experience gains/losses, we assumed Average Future Working Lifetime, averages over all actives and retirees (retirees are assumed to have no future working years). For asset gains and losses, we assumed 5 years.
Financial and Census Data	The District provided the participant data, financial information and plan descriptions used in this valuation. The actuary has checked the data for reasonableness, but has not independently audited the data. The actuary has no reason to believe the data is not complete and accurate, and knows of no further information that is essential to the preparation of the actuarial valuation.
Plan Fiduciary Net Position	Market value of assets as of the measurement date
Measurement Date	June 30, 2022
Valuation Date	June 30, 2021. Results have been rolled forward (an actuarial adjustment) to June 30, 2022.
Funding Policy	The District intends to contribute the full ADC to the Plan each year. Contributions would be made up of cash contributions made to the trust as well as any benefit payments (implicit and explicit) unreimbursed by the trust.
	When the Plan is fully funded, the District's ADC is \$0, since there are only retirees in the Plan.
Valuation Model	Results in this report were calculated with the assistance of ProVal actuarial valuation software. ProVal model was developed in 1994 and maintained by Winklevoss Technologies (WinTech). WinTech provides valuation and projection software for both pension and other postemployment benefit plans. We utilize ProVal in accordance with its intended purpose and have not identified any material inconsistencies in ProVal's assumptions nor outputs that would affect this valuation.

Section VI Glossary

A) Key Terms

Annual OPEB Expense	The amount recognized by an employer in each accounting period for contributions to a defined benefit OPEB plan on the modified accrual basis of accounting.
Deferred outflows and inflows of resources related to OPEB	Deferred outflows of resources and deferred inflows of resources related to OPEB arising from certain changes in the collective net OPEB liability or collective total OPEB liability
Covered Payroll	Annual compensation paid (or expected to be paid) to active employees covered by an OPEB plan, in aggregate.
Net OPEB Liability (NOL)	The liability of employers and non-employer contributing entities to plan members for benefits provided through a defined benefit OPEB plan that is administered through a trust that meets the criteria of the GASB Statements.
Normal Cost or Service Cost	The portion of the Total Present Value of Future Benefits attributed to employee service during the current fiscal year by the actuarial cost method. These terms are used interchangeably.
Other Postemployment Benefits (OPEB)	Retiree health care benefits and post-employment benefits provided separately from a pension plan (excluding termination offers and benefits).
Plan Fiduciary Net Position (FNP)	Set equal to the market value of assets as of the measurement date.
Present Value of Future Benefits (PVFB)	The value, as of the valuation date, of the projected benefits payable to all members for their accrued service and their expected future service, discounted to reflect the time value (present value) of money and adjusted for the probabilities of retirement, withdrawal, death and disability.
Total OPEB Liability (TOL)	The portion of the actuarial present value of projected benefit payments that is attributed to past period of member service in conformity with the GASB Statements. The total OPEB liability is the liability of employers and non-employer contributing entities to plan members for benefits provided through a defined benefit OPEB plan that is not administered through a trust that meets the criteria of the GASB Statements.
